ENVIRONMENTAL POLICY

Resource Chemical Ltd is committed to operating practices which are compatible with maintaining and improving the environment. We are committed to reducing emissions and the prevention of pollution. It is our policy to set and review environmental objectives and targets, investing the necessary resources as required.

Legislative requirements

Resource Chemical Ltd complies with all relevant legislative requirements.

Energy

It is our desire to minimise the quantities of non renewable energy resources used while distributing our products.

Solid waste

It is our aim to minimise the quantity of waste, including packaging materials, and to recycle whenever practical.

Emissions

We are committed to ensuring that air and noise emissions are compliant with the legislative requirements.

Training

We are committed to providing the necessary resources for training employees and sub contractors to ensure that we operate in a manner conducive with maintaining the environment. In doing so we recognise the important role each employee makes to a successful environmental programme.

Communications

We will communicate our policy to all employees, customers, the local community and other interested parties.

Environmental Management Systems

Resource Chemical Ltd attempts to protect the environment, by employing the following tools:

Catchment bunding for wet products.

Segregation policy.

Quarantine area.

Training.

Waste

Resource Chemical Ltd attempt to operate a zero waste policy, all non-conforming items are either rejected or quarantined pending return/disposal. Disposal of products is undertaken through registered waste disposal companies.
