## HEALTH AND SAFETY POLICY

It is the policy of Resource Chemical Limited to comply with the terms of the Health and Safety at Work Act 1974 and subsequent legislation and to provide and maintain a healthy and safe working environment. Resource Chemical Limited's health and safety objective is to minimise the number of instances of occupational accidents and illnesses and ultimately to achieve an accident free workplace.

All employees will be provided with such equipment, information, training and supervision as is necessary to implement the policy and achieve the stated objective.

Resource Chemical Limited recognises and accepts its duty to protect the health and safety of all visitors to the company, including contractors and temporary workers, as well as any members of the public who might be affected by its operations.

While the management of Resource Chemical Limited will do all that is within its powers to ensure the health and safety of its employees, it is recognised that health and safety at work is the responsibility of each and every individual associated with the company. It is the duty of each employee to take reasonable care of their own and other people's welfare and to report any situation which may pose a threat to the well being of any other person.

The management of Resource Chemical Limited will provide every employee with the training necessary to carry out their tasks safely. However, if an employee is unsure how to perform a certain task or feels it would be dangerous to perform a specific job then it is the employee's duty to report this to the Operations Manager or the Safety Officer. An effective health and safety programme requires continuous communication between workers at all levels. It is therefore every worker's responsibility to report immediately any situation, which could jeopardise the well being of themselves or any other person.

All injuries, however small, sustained by a person at work must be reported to the Operations Manager. Accident records are crucial to effective monitoring and revisions of the policy and must therefore be accurate and comprehensive.

Resource Chemical Limited's health and safety policy will be continually monitored and updated particularly when changes in the scale and nature of our operations occur. The policy will be updated at least every 12 months.

Resource Chemical Limited is committed to preserving and improving the environment in which it operates and contributes, where practical, to the improvement of the environment in general.

The specific arrangements for the implementation of the policy and the personnel responsible are detailed below.

Nicola Bradley  
Managing Director
